

Litepaper Chronic Token

Our goal is to make a difference while literally growing profits for holders. This is why we are committed to donate 50% of profits to help feed the hungry.

Not only will we be donating profits but we will host food drives and offer hot meals weekly with the goal of eventually being able to provide meals daily around the world!

After donating the half the profit;
We will invest the other remaining 40% back into the token ensuring that value is being added back into the token giving investors incentive to hold.

Chronic Token is also ready to announce that we are currently working on our NFT marketplace and crypto reading platform giving our token more usecase.

Soon we will announce our partnership with different world WEED companies, clubs, associations; this will allowed you to purchase and sell Weed with transaction P2P.

P2P refers to the exchange of cryptocurrencies, which was created with the goal of enabling anonymous P2P transactions that don't require processing by a financial institution.
